Traits of a High Performing Health Care Organization

DESCRIPTION

The AHCA Quality Initiative focuses on improving quality of care for residents and patients. Furthermore, in the ever-changing world of healthcare, high quality results ensure a spot in a narrowing network. There will be winners and losers in this marketplace. In order to win, it's more important than ever for a health care organization to demonstrate key pay-for-performance capabilities such as measuring and leveraging Readmissions, Functional Improvement Scores, 5-Star Rating, and Customer Experience.

There are distinguishing themes of these high performing health care organizations. These themes are the foundation for high quality results. Learn from the CEO of a chain of facilities about how they have implemented these themes throughout their organization and thereby achieved the requirements of a preferred provider in a narrowed network. Follow along as he shares real-world scenarios and best practices in laying the groundwork, testing and leveraging results. This presentation has interactive elements, allowing the audience to participate in the discovery process and gives tangible examples of how to achieve similar results in your market.

LEARNING OBJECTIVES

1. Review the features and themes of high performing, successful health care organizations and learn how you can apply these to your organization.

2. Demonstrate key pay-for-performance capabilities and leverage that data with referral sources to become a preferred provider.

3. Learn how to know your data, affect your data, and develop actionable insights to demonstrate high quality results.
