

Medication Jeopardy

DESCRIPTION

This session is based on information gleaned from surveys and experience over the past 10 years of auditing medication systems. Medication Jeopardy is a fun way to learn and remember critical policies, procedures, and common mistakes made during the administration of medications. This is a game format. The categories can vary from Open Date, Infection Control, Pharmacy Policy, Rights and Medication Errors. This session is designed to train those who handle and distribute medications and to give trainers insight into using the tool for future education. A disk with the game and its instructions will be given to each participant. This session will also discuss the important elements of making training viable for adult learners with a variety of learning styles.

LEARNING OBJECTIVES

1. Will learn how to use games as learning tools.
2. Will learn how to determine adult learning styles.
3. Will receive teaching ideas and tools.
