

Keep Your Vaccine Participation Rate High

Congrats! You reached a high vaccine participation rate during clinics but now your resident population has discharged, you have daily new admits, and new staff hires...many unvaccinated. Now what? With vaccine participation rate tied to family visitation, it's important to keep rates high to increase resident quality of life.

INTRODUCING THE PHASE 2 VACCINE CONTINUITY PLAN

THE GOAL: Maintain $\geq 75\%$ full vaccination protection in LTC facilities to:

- 1) Re-open to visitors
- 2) Restore normal operations and social activities for residents and staff
- 3) Continue to reduce community infection rates and hospital admissions

THE PATH: Vaccinate new admits and new staff. Continue to promote vaccinations for existing staff. Vaccinate at least one designated visitor per resident.

100%

Vaccinate All
New admissions

75%

Coverage of
All Facility Staff

100%

Coverage of Life
Enrichment Visitors to Your Community

THE PROGRAM: Shifting from clinics to dispensing model, activated partner facilities can order vaccines from pharmacy to be delivered as part of their routine delivery. Pharmacy will provide product, clinical guidance, and Vaccine Administration Software to plan and track your COVID vaccination activity. Pharmacy will also report vaccine activity to Federal IIS systems, and provide data to support facility reporting needs, including local jurisdiction requirements.

ACTIVATE → ORDER → RECEIVE → VACCINATE

Keep your vaccine participation rate high by continuing to offer the life-saving COVID-19 vaccines to staff and residents in your facility and community by partnering with Consonus.
