Innovation in Rehabilitation

COMMUNITY RESIDENTS ARE WELCOME to visit FACILITY NAME GOES HERE for outpatient rehabilitation from the area's most trusted provider of services to seniors. Our therapists are experienced in working with mature clients to enhance health, well being, and quality of life.

We assess each person's individual needs and establish a treatment plan designed to promote the greatest degree of function and independence possible.

We work closely with local Physician groups to care for seniors with a variety of conditions, including:

ORTHOPEDIC INJURIES, NEUROLOGICAL IMPAIRMENTS, VESTIBULAR DISORDERS & PAIN MANAGEMENT

PHYSICAL THERAPY

PT Evaluations and treatments are often indicated for people with illnesses or injuries which result in pain, weakness or loss of coordination/balance. Our PTs can use a variety of treatment modalities and procedures to help you move and feel better.

OCCUPATIONAL THERAPY

OTs specialize in helping people get back to doing the functional activities which occupied their day. For individuals with illness or injury, OTs help them achieve their maximum level of ease and independence with activities of daily living and leisure activities. Our OTs are also trained in cognitive assessments to determine safe living environments for clients with dementia.

SPEECH LANGUAGE PATHOLOGY

SLPs work with clients having difficulty with speech, swallowing, or cognitive skills. Treatments may focus on increasing intelligibility of speech, developing strategies for problem solving, or improving swallowing safety through oral motor strengthening and/or diet modification. Our SLPs are also certified in Vital Stim™ Therapy to re-educate swallowing muscles.
