

TERI FERREIRA R.PH.

VICE PRESIDENT OF OPERATIONS

CONSONUS HEALTHCARE — PHARMACY/WASHINGTON

The world of pharmacy made an impact on Teri Ferreira at a very early age. Her father managed a drug store, and as small child she remembers admiring the way the pharmacist was always helping people—and of course, her bright white lab coat.

Teri has been General Manager of Washington Pharmacy Services for Consonus Healthcare since 2007. Besides being responsible for day-to-day management of pharmacy operations, she helps customers implement electronic medical records technology and strategize opportunities to reduce costs associated with medications.

After graduating with a Bachelor of Pharmacy degree from Washington State University, Teri gained extensive professional experience in both retail and long-term care pharmacy positions, including nine years as a consultant pharmacist. She also served as Director of Pharmacy and Retail Operations for The Everett Clinic, overseeing three pharmacy locations.

Teri is a past president of the Washington State Pharmacy Association, and serves on the organization's Legislative and Regulatory Affairs Council. She's also actively involved with the Washington Health Care Association and Aging Services of Washington in activities and education.

She enjoys reading historical fiction, attending sporting events, camping or traveling with her husband and kids. She's an active supporter of the Vital Life Foundation, and each year pulls together a gift-giving team of pharmacy colleagues that adopts the residents of a local skilled nursing facility.
