

LISA HYNES

VICE PRESIDENT

AGERIGHT CARE MANAGEMENT SOLUTIONS

Lisa Hynes has spent virtually her entire professional life in managed care. From her first position with a small Health Maintenance Organization (HMO) in Salem, Ore., her career journey has included stops at Regence BlueCross/BlueShield of Oregon and Legacy Health Systems. She spent 12 years with Health Net Health Plan of Oregon, where she served as Provider Relations Manager, Provider Contracting Manager, and most recently, Vice President of Provider Network Management.

Now as Vice President of AgeRight Care Management Solutions at Marquis Companies, Lisa oversees AgeRight Health Plan, Clinical Services and Post-Acute Care Network. She's responsible for driving transformative changes to MCO payment methodologies and billing/payment efficiency, and for coordinating hospital health system relationships as new post-acute care solutions and alternative payment models are developed.

While working across the table from Marquis leadership in contract negotiations over the years, Lisa developed an appreciation for how the company maintained a passion for the people served, and a commitment to driving innovation and challenging the status quo. "Even in difficult times, they kept a strong moral compass, and never lost sight of the quality care provided to residents," she said. "I'm proud to be working with such a compassionate and driven team."

A true Oregonian at heart, Lisa enjoys water and snow skiing, snowmobiling, cooking, wine tasting and watching college football. She grew up on a small farm near Silverton, Ore., and raised her three children on a century farm. As an avid horseback rider with 12 head of Scottish Highland cattle in the pasture, she's never moved far from her roots.

Charity involvement includes developing future agriculture leaders through Silverton High School's FFA program, and Lisa has served for nine years on the Children's Cancer Association's Ambassador Board. She's also a board member of the Oregon Healthcare Finance Management Association (HFMA).
